In Case of Emergency: Respect All People and Families

We the undersigned call on the next President to develop a health care plan for America that ensures equal access to quality health care for LGBT people and those with HIV. Equal access means that hospitals must treat all patients with dignity and respect by adopting and implementing visitation policies that include as "family" same-sex partners, their children and other people who play a significant role in the individual patient's life. It also means that health care professionals must provide care without discrimination and honor the wishes of all patients.
